John Dalton is a senior electricity market analyst and electricity policy consultant with over 25 years of experience in energy market analysis, power procurement, project valuation, and policy analysis and development. He offers extensive experience in the evaluation and analysis of electricity markets and the competitive position of generation technologies and projects within these markets including the assessment of the competitiveness of the underlying market, the development of power market price forecasts, the implementation of power procurement processes, and the development and evaluation of renewable energy policies. John has used market price forecasting tools to evaluate generation and transmission system investments in markets across North America. He has defended these forecasts in formal regulatory proceedings and before lenders and investors. John also has extensive experience with respect to the application of competitive procurement processes for transmission investments, advising clients on the development and participation in such processes. He has testified on electricity market price forecasts, wholesale market competitiveness issues, transmission pricing issues, power contracting policies and electric utility resource planning issues. He has a B.A. in Economics from Brown University and an M.B.A from Boston University.
